	CENTRAL IMPRELLIBERGE AND	a listan
	INFORMATION REPO	CD NO.
COUNTRY	East Germany/USSR	DATE DISTR. 15 July 1954
SUBJECT	Equipment for Submarines to be Developed by VEB Funkwerk Keepenick	NO. OF PAGES 1
PLACE ACQUIRED	by van Fallandia noopenica	NO. OF ENCLS. 634717
DATE OF INFO.		SUPPLEMENT TO 272789 25X1 REPORT NO. 25X1
The second of th	Configure introduction of Free Interests, parameter in the parameter in the parameter of th	S UNEVALUATED INFORMATION
		25X1
	The submarine	
	It is to be equipped with two devices use	is now in Rostock. 25X1 d by German submarines during
	It in to be equipped with two devices use the war:  a. A group listening device (Gruppenhore under-water locating. Its main piece vibrator which is excited by the nois and makes it possible to determine th	d by German submarines during hgeraet), an impulse device for of equipment is a crystal e of the screws of other vessels
	It is to be equipped with two devices use the war:  a. A group listening device (Gruppenhore under-water locating. Its main piece vibrator which is excited by the nois and makes it possible to determine the the vibrations have been amplified.  b. An S-installation (C-anlage, Schallan equipment is a magnetostrictive sound operating in the frequency between 15 receives impulse.	hgeraet), an impulse device for of equipment is a crystal e of the screws of other vessels e direction of the noise after
	It is to be equipped with two devices use the war:  a. A group listening device (Gruppenhore under-water locating. Its main piece vibrator which is excited by the sois and makes it possible to determine the the vibrations have been amplified.  b. An S-installation (C-anlage, Schallan equipment is a magnetostrictive sound operating in the frequency between 15 receives impulse.	hgeraet), an impulse device for of equipment is a crystal e of the screws of other vessels e direction of the noise after  lage). Its main fiece of vibration of the emits and fequipment is a crystal.
	It is to be equipped with two devices use the war:  a. A group listening device (Gruppenhore under-water locating. Its main piece vibrator which is excited by the sois and makes it possible to determine the the vibrations have been amplified.  b. An S-installation (C-anlage, Schallan equipment is a magnetostrictive sound operating in the frequency between 15 receives impulse.	hgeraet), an impulse device for of equipment is a crystal e of the screws of other vessels e direction of the noise after  lage). Its main piece of vibration from mu metal, and 3 hich emits and 6 equipment e direction and e determined.
	It is to be equipped with two devices use the war:  a. A group listening device (Gruppenhore under-water locating. Its main piece vibrator which is excited by the sois and makes it possible to determine the the vibrations have been amplified.  b. An S-installation (C-anlage, Schallan equipment is a magnetostrictive sound operating in the frequency between 15 receives impulse.	hgeraet), an impulse device for of equipment is a crystal e of the screws of other vessels e direction of the noise after  lage). Its main fiece of vibration from mu metal, and 3 hich emits and 6 equipment e direction and e determined.
	It is to be equipped with two devices use the war:  a. A group listening device (Gruppenhore under-water locating. Its main piece vibrator which is excited by the sois and makes it possible to determine the the vibrations have been amplified.  b. An S-installation (C-anlage, Schallan equipment is a magnetostrictive sound operating in the frequency between 15 receives impulse.	hgeraet), an impulse device for of equipment is a crystal e of the screws of other vessels e direction of the noise after  lage). Its main piece of vibration from mu metal, and 3 hich emits and 6 equipment e direction and e determined.
	It is to be equipped with two devices use the war:  a. A group listening device (Gruppenhore under-water locating. Its main piece vibrator which is excited by the sois and makes it possible to determine the the vibrations have been amplified.  b.
